Subject: Registration waiver under clause 15(iv) of Department of Expenditure's Public Procurement Order No. 4 dated 23.02.2023 in respect of utilizing lithium-ion cell technology for Grid Connected Battery Energy Storage System (BESS) tenders.

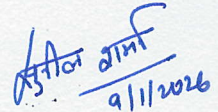

Sir /Madam

The Ministry is in receipt of requests from BESS manufacturers seeking waiver of the DPIIT registration requirement, for bidders with Transfer of Technology (ToT) arrangements with land-border sharing countries, using lithium-ion cell technology in grid-connected BESS tenders.

2. India's revised NDC targets a 45% reduction in GDP emission intensity, 50% non-fossil installed capacity by 2030, and net-zero emissions by 2070, necessitating large-scale deployment of Energy Storage Systems (ESS) for a secure and reliable grid. CEA has projected the BESS requirements of 208 GWh by 2029-30, against the existing capacity of about 0.5 GWh. The domestic grid-scale battery manufacturing is in a nascent stage. At present, lithium-ion cells remain the most mature and cost-effective technology used in the grid connected Battery Energy storage system world-wide.

3. In view of the non-availability of adequate domestic manufacturing of lithium-ion cells in the country, the Ministry hereby waives the requirement of registration, in respect of para 3 of DoE Order (Public Procurement No. 4) vide F No. 7/10/2021-PPD (1) dated 23.02.2023, for bidders utilizing lithium-ion cell technology, for 1 year from the date of issue of this letter, to facilitate their participation in BESS tenders.

Subject: Registration under clause 15(v) of Department of Expenditure's Public Procurement Order No. 4 dated 23.02.2023 in respect of lithium-ion cell technology in Grid Connected Battery Storage System (BESS) tender.

Sr. Madam

The Ministry is in receipt of request from BESS manufacturers seeking waiver of the OPIT registration requirement for bidders with Financial of Technology (FoT) management with land-border sharing countries using lithium-ion cell technology in grid-connected BESS tenders.

India's revised NDC targets a 45% reduction in GDP emission intensity, 20% non-fossil installed capacity by 2030, and net zero emissions by 2070, necessitating large-scale deployment of Energy Storage Systems (ESS) for a secure and reliable grid. CE A has projected the BESS requirement of 208 GWh by 2032-30, against the existing capacity of about 8.7 GWh. The domestic mid-scale battery manufacturing is in a nascent stage. At present, lithium-ion cells remain the most mature and cost-effective technology used in the grid-connected battery energy storage system worldwide.

In view of the non-availability of adequate domestic manufacturing of lithium ion cells in the country, the Ministry hereby waives the requirement of registration, in respect of para 2 of the Order (Public Procurement No. 4) vide F. No. Y190321-PD (1) dated 23.02.2023, for bidders utilizing lithium-ion cell technology, for 1 year from the date of issue of this letter to facilitate their participation in BESS tenders.

This issue with the approval of Competent Authority.
